Others

About the seminar

Natural products are the gift of Nature, they have been used from the origin of life and now their uses are accelerating in different fields of our life like prevention of different diseases like cancer, diabetes, leishmania, etc., and drug development against them. To get better natural products from several natural sources like microbes, plants, animals, etc., modern technologies are being applied. Moreover, for sustainable utilization of natural resources for isolation of natural products is very much required, as a result, our demand will be fulfilled as well as environmental health will be kept well. Moreover, our traditional home therapy is now accepted in many foreign countries like Germany, Spain, etc. For discussion with this theme, this international seminar will be organized in our institution by the Cancer Research Unit, and Swami Vivekananda Center for Multidisciplinary Research in Basic and Social Science, It will be inaugurated by an eminent person at 11.00 A.M on 22 March 2024 and several resource persons including foreign scientists will discuss this theme with more than 500 participants (UG, PG students, research scholars, and faculties of our institution and other institutions like the university and research institutions. Moreover, the programme will include a keynote speech, invited lectures, oral presentation, poster presentation, prize distribution, valedictory session, and a vote of thanks.
